Push to Turn Latchlock

Introducing the new and improved push-to-turn latchlock from Lowe & Fletcher. Manufactured in the UK to exacting standards, this lock has a distinct and audible "click" when the handle reaches the locked position. This, combined with a smooth rotational feel, makes it very easy to use.
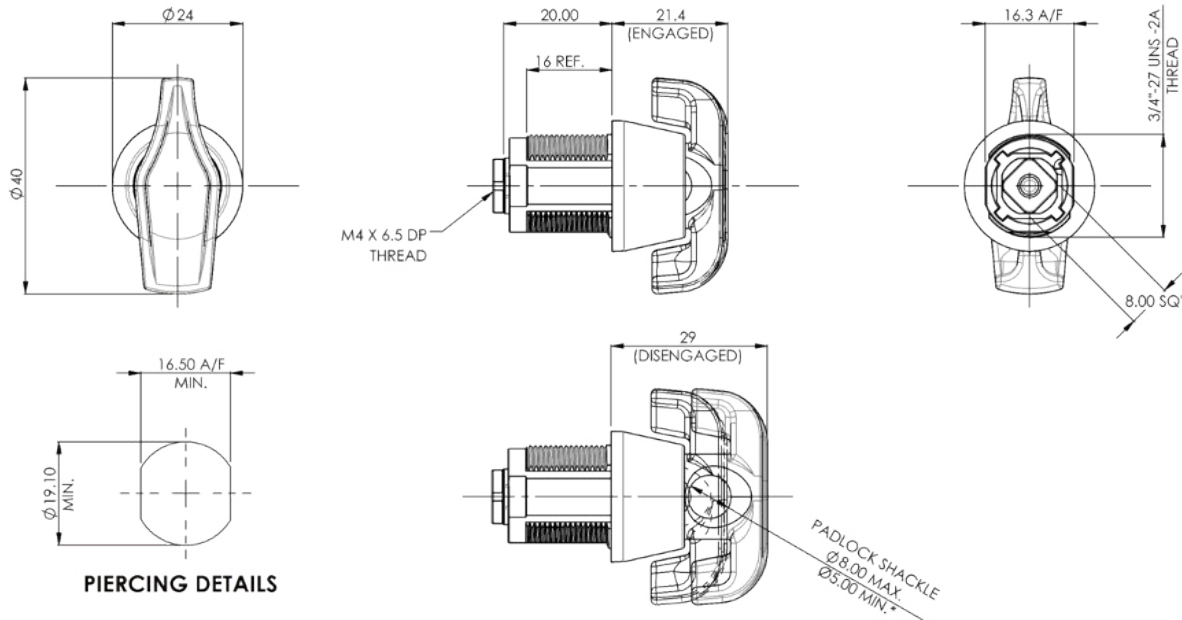

When secured with a padlock, the latchlock handle is disengaged and spins freely to help prevent the lock being forced.

With a robust design and simplicity of use, this latchlock is extremely versatile and suitable for a broad range of applications including lockers, office furniture and personal storage in any environment.

Standard Features

- Standard movements: 01 (90°CW), 02 (90°ACW)
- Standard finish: Barrel Nickel
  Bright Chrome (available on request)
