

Electronic Latch Locks

Smart Locking Systems

Reliable durability

The Lowe & Fletcher range of electronic latch locks incorporate a number of innovative features. These include both key and mechanical cable overrides, a floating door bolt to accommodate potential door mis-alignment, and a precision motor driven mechanism with powerful operation even under load.

These latches have been designed for easy connection and control and include an internal sensor for feedback on whether the door is closed. They have a push-to-lock action and on opening will push the door slightly ajar. For even greater door movement a spring-loaded plunger is available as a replacement for the key override barrel.

Available in 5V or 12V versions or IP-rated, the latches are supplied with a door mounted striker bolt and come with a 2, 4 or 6 metre cable.

Rigorously tested for durability and reliability, these latches are compatible with our Zodiac Smart Locking System and are ideal for use on a wide variety of smart lock applications such as personal lockers, postal and delivery systems, asset management systems and other enclosures.

Technical data

	3792 / 3793	3777 / 3778
Interface	JST - S6B - PH - SM4 - TB	JST - S6B - PH - SM4 - TB
Dimensions	70 x 80 x 20mm	70 x 120 x 20mm
Pull out force	3000N	2100N
Maximum load for electronic opening	150N at 5V and 12V	150N at 5V and 12V
Housing material	Zinc alloy	Reinforced plastic
Weight	350g	205g
Operating temperature range	-10 to + 50°C	-10 to + 50°C
Standby current	1.4mA	1.4mA
Maximum current draw	300mA	300mA

Principal dimensions

Product ID: 3792/3793

Striker Sub Assembly

Product Code	Product ID	"x" Dimension
9519010	3792/3793	20mm
9519011	3792/3793	22mm
9519016	3777/3778	20mm
9519017	3777/3778	22mm

Electrical information

The latch input and outputs connect directly to an on-board microprocessor (uC). There is one input to specify lock/unlock (2). This is internally pulled up. When it is connected to VCC (1) or left unconnected the latch will be locked. The latch will unlock when lock/unlock (2) is pulled low (connected to ground) for longer than 10ms.

There are three outputs that indicate the status of the latch. The presence of a latch is indicated by a low signal on the latch present output (3).

The locked status (4) indicates whether the latch is in the locked position (high) or not (low). When this output is high the latch internally is in the locked state. If the door is still open, it will be locked shut when it is next closed.

The latched status (5) indicates whether the striker bolt is latched into the lock (high) or not (low). This identifies whether the door is shut and locked or not. If the latch is unlocked (see above), the latched indicator will always be low.

Connection Diagram

Timing Diagram

Male Connector

MPN	JST, PHR-6	
Pin	Description	
1	+5V or +12V	
2	in - lock/ unlock	
3	Out - latch present (active low)	
4	Out - locked (active high)	
5	Out - latched (active high)	
6	Ground	

Typical applications

The electronic latches are compatible with our Zodiac Smart Locking System which works brilliantly across many applications and is ideally suited to the following:

Fitness & Leisure

- Perfect for gyms and health clubs who want to differentiate themselves from the competition
- Create aesthetically modern locker rooms with no visible locking hardware
- \oslash Brand the touchscreen and push useful information through it
- Configure advanced settings for such things as session duration, limiting lockers per user, overnight clear-out and to easily open all lockers for cleaning

Parcel lockers

- Zodiac ensures smooth deliveries without the need for anyone to be kept waiting
- Courier independent: packages can be safely and securely deposited in seconds simply by selecting the recipient's name on the touchscreen
- Parcel lockers can be fitted in lobbies or outside
- Add value for residents by securely handling deliveries
- Allow staff to receive parcels at work without unduly occupying company logistics operators
- IP-rated hardware for outdoor installations switch out the electronic latches and touchscreen for water resistant versions

Accessories 3792/3793

37928K - 5V Latch (Silver Electrophoretic) **37938K** - 12V Latch (Silver Electrophoretic)

*Optional colours available

9519010 - Striker assembly (flush fit)9519011 - Striker assembly (2mm stand-off)

9235435 - Plug (barrel replacement with anti-drill pins)

9519013 - 13mm spring-loaded door plunger (replaces barrel override)

9560520 - 2 metre cable 9560540 - 4 metre cable 9560560 - 6 metre cable

*Other lengths available on request NOTE: All cables have male connectors both ends

ACCESSORIES

Accessories 3777/3778

37770H - 5V Latch (Black reinforced plastic) **37780H** - 12V Latch (Black reinforced plastic)

9519016 - Wet environment striker assembly (flush fit) **9519011** - Wet environment striker assembly (+2mm stand-off)

9519013 - 13mm spring-loaded door plunger (replaces barrel override)

9560920 - 2 metre cable **9560940** - 4 metre cable **9560960** - 6 metre cable

*Other lengths available on request

NOTE: All cables have silicone boot and retaining band one end with male connector the other

We're here and ready to help

We have been manufacturing smart locks and locking systems in our UK facility for over 20 years and have sold over 2 million smart locking solutions globally. Supported by our expert teams in Europe and America, we are your trusted partner for any locking requirement.
