

FITNESS LOCKING SOLUTIONS

An extensive range of personal storage locking systems that are built to last.

SMART SECURITY

Locking solutions for the fitness and leisure industry.

From e-locks to mechanical locks and smart locker management systems we've got you covered! Euro-Locks and Lowe & Fletcher design, manufacture and supply an extensive range of innovative and well-engineered locking systems to suit every requirement.

MECHANICAL

E-LOCKS

CONNECTED LOCKING SYSTEMS

TOUCHSCREEN TERMINAL

The gloss black touchscreen fits flush to the locker face. It is bright, high resolution and robust enough for public use in monitored, indoor environments such as changing rooms. It is easily mounted with adaptable fixing brackets. The intuitive control system includes wi-fi and ethernet connectivity.

DISTRIBUTION BOARD

These communication units connect to the terminal and each can control up to 12 e-latches. Additional boards can be linked together to control up to 3,060 e-latches in total. This modular nature of the system makes scaling and maintenance straightforward.

ELECTRONIC LATCH

The unobtrusive e-latch has best in class security and fast and quiet opening, even under load. It has a rugged metal case and features a manual key override and optional rear mechanical cable override. The locking bolt is designed to accommodate minor door misalignment, to make fitting easier.

WHY EURO-LOCKS?

As a specialist manufacturer of locking systems, Euro-Locks and Lowe & Fletcher supply a wide variety of locks and locking solutions for fitness and leisure applications.

The teams at Euro-Locks and Lowe & Fletcher work closely with our customers to ensure they have the right locks and locking systems for their requirements.

Our product range is extensive and all of our locking systems are designed, engineered and manufactured in one of our six facilities.

So whether you are looking for a standard locking system, an adapted design or a totally bespoke solution we are able to develop products to meet all your locking needs.

Part of The Lowe & Fletcher Group, we have been making locks since 1889 and manufacture over 80 million locking systems annually.

ADVANTAGES

- A varied range of digital, RFID and mechanical locking systems including smart locking systems designed for Lockers and Personal Storage
- We can supply standard or bespoke products in high or low volumes
- We work closely with our customers to design bespoke locking solutions specific to their exact requirements
- We manufacture over 80 million locking systems annually from our European and UK factories
- We have made locks since 1889 and are a sixth-generation family owned business

From the simplest mechanical lock through to RFID and electronically controlled systems, we have a solution to suit all needs. If you need advice or a bespoke solution please contact our team who will be happy to help you.

SMART LOCKERS IN FITNESS AND LEISURE

Smart lockers are perfect for gyms and health clubs that want to stand out from the crowd. They allow hassle-free allocation to lockers for both you and the customer while the advanced smart lock features allow you full control of the lockers, onsite or with remote access.

OUR SMART LOCKER SYSTEMS

ZODIAC SMART LOCKING SYSTEM

Zodiac smart locking system for fitness and leisure is more than just state-of-the-art locking hardware. Our touchscreen, smart locker management system can be integrated with access control systems to provide a complete solution for fitness and leisure applications. The self-service system provides customers with automatic locker allocation using either a PIN number or RFID reader.

- Perfect for gyms and health clubs who want to differentiate themselves from the competition
- Create completely sleek locker rooms with no visible locking hardware
- Brand the touchscreen and push useful information
- Configure advanced settings for such things as session duration, limiting lockers per user, overnight clear-out and to easily open all lockers for cleaning

ACCESS CODE MANAGED SYSTEM

The Access Code Managed system is ideal for gyms and health clubs who favour the benefits of an easy set up web-managed connected locking system. Using our proven Remote Allocation System (RAS) technology, a 4-digit PIN is issued to the customer which remains valid for the duration of their visit. The PIN can be handed to the customer at reception or sent via email or SMS.

- The code for the next user is generated using the RAS website
- Locks do not require an internet connection
- Schedule bookings and send customers their codes

Adapt the functionality of the Access Code Managed system with the Real-Time Clock (RTC) feature. The RTC feature can help alleviate the issues caused by users who leave their belongings in a locker even when not on site. As the lock keeps track of the time and date, they can be set to open at a chosen time and left items can be removed, leaving all of the lockers in use all of the time. It also means lockers can be rented for set periods of time.

“THE NEW HORIZON LOCKS ARE THE PERFECT ADDITION TO OUR STUDIOS. RELIABLE AND STYLISH, THE LOCKS WERE SIMPLE TO INSTALL WITH THE HELP AND SUPPORT OF THE EURO-LOCKS TEAM WHO WERE ALSO ON HAND TO OFFER TRAINING AND ADVICE.”

Frank Dillinger, Smile-X Dudweiler / Germany

“THE DIGITAL LOCKING SOLUTION PROVIDED BY L&F HAS IMPROVED OUR CUSTOMERS’ EXPERIENCE IN THE CHANGING AREA. ACCESSIBILITY OF THE LOCKER COMPARTMENTS AND MANAGEMENT OF THE KEYS IS NOW A MUCH SIMPLER AND MORE EFFICIENT PROCESS.”

Andrew Pullison, The Workhouse Fitness Club / United Kingdom
