

Omnis Locking System

Convenient and versatile system

Introducing Omnis from Euro-Locks, the new, high security locking system for roof boxes and tow boxes.

The innovative design has a patented two-step closing system (patent ID: BE11295) which enables you to secure either side of the roof box before engaging the central locking mechanism (when used as a 3-point locking system). The design also ensures the key remains trapped in the open position, making it impossible to remove if all three locking points are not closed.

With 4,000 possible combinations, the lock also has a patented soft dust shutter (patent ID: BE11311).

The unique design makes the Omnis system adaptable to any automotive product on the market. Available as a 1-point (product ID: E201), 2-point (product ID: E202) or 3-point locking system (product ID: E203), this unique locking system meets current market standards for vehicle storage boxes.

The system is adaptable to all existing automotive products and meets current market standards for vehicle storage boxes.

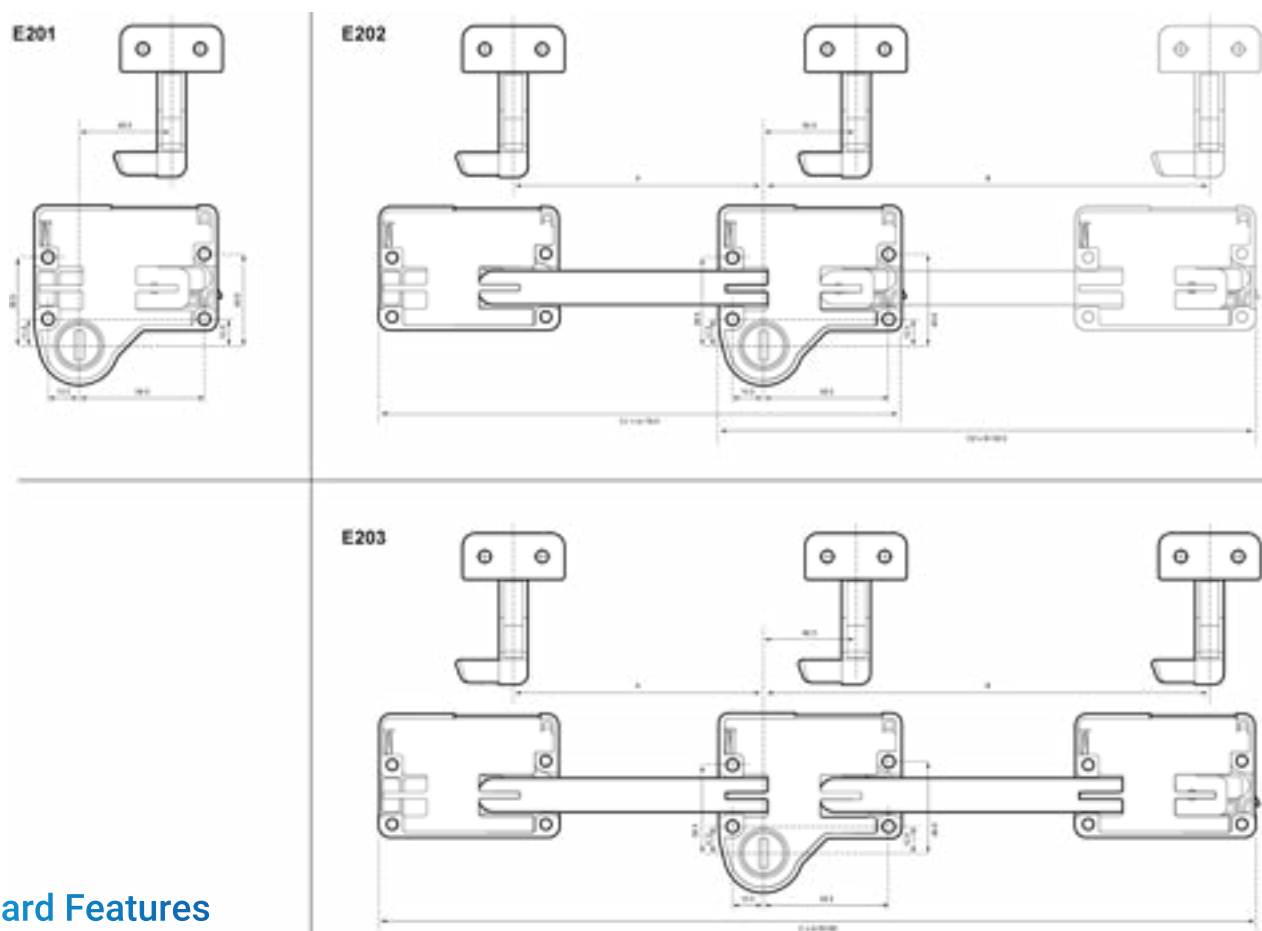

So how does this work?
